

Press release

Pre-announcement of 6th Joint Call

New Targets, Compounds and Tools

We are pleased to pre-announce the 6th Joint Call for transnational research projects “New Targets, Compounds and Tools”. To date fifteen countries are participating with a total budget of approximately 13 million Euros. The launch of the 6th Call will be in January, 2018.

This year the WHO published the Global priority pathogen list of antibiotic-resistant bacteria to guide research, discovery, and development of new antibiotics (PPL). The 6th joint call for proposals addresses this list, with the aim to discover new targets, compounds, or new tools with the potential to help controlling infections by drug-resistant bacteria identified by the WHO as priority pathogens (including multi- and extensively drug-resistant *Mycobacterium tuberculosis*). Projects considered for funding will involve fundamental and/or translational One Health research, with the exception of clinical trials.

Participating countries & eligibility

Consortia of eligible scientists from Belgium (FWO), Czech Republic, Egypt, Finland, France, Germany, Ireland, Israel, Italy, Latvia, Norway, Poland, Spain (MINECO / ISCIII), Sweden and Switzerland may apply for funding in this call.* Consortia must include a minimum of three eligible partners from at least three different countries participating in the call, and a maximum of 6 project partners (or 7 if a partner from Czech Republic, Latvia or Poland is included).

For more information about the 6th Call “New Targets, Compounds and Tools”, please visit www.jpimar.eu and follow @JPiAonAMR.

** List is provisional – additional countries may join. Final eligibility conditions will be published when call opens.*
