

Estonia

Estonia is represented in JPIAMR mainly by the Estonian Ministry of Social Affairs but also by the Estonian Research Council. AMR related research in Estonia has so far been mostly funded through the Estonian Research Council grants, sectoral R&D funding schemes and national research and development programmes.

National AMR Action Plans

- Currently under development

National AMR research calls

- Estonian Research Agency launched call "Options for controlling and reducing antimicrobial resistance" (main aim: to develop scientifically founded recommendations, based on One Health principle, on AMR policy development and controlling the spread of AMR); 2019

National AMR research programs

- Currently no special programme running

Activities on AMR actions at national level

- National AMR committee was compiled and the work has started
- Through nationally funded AMR projects, a website for AMR has been developed: <https://sisu.ut.ee/amr/avaleht>
