France is represented by two organisations; The French National Research funding Agency (ANR) and the French National Institute of Health and Medical Research (Inserm) in the JPIAMR. Inserm is a public scientific and technological institution, placed under the dual supervision of the Ministry of Health and the Ministry of Research. Dedicated to biological, medical and human health research, it covers the entire field from fundamental and laboratory research to the patient's bedside. On the international scene, Inserm partners with most large research institutions committed to scientific and medical progress. Inserm is the only French public scientific and technological institute (Research Performing Organisation) to focus entirely on human health. ANR is a research funding organization and aims to bring more flexibility to the French research system, foster new collaborations and cutting edge-strategies for acquiring new knowledge. By identifying priority research areas and supporting private-public collaborations, it also aims to enhance the general level of competitiveness of both the French research system and the French economy. International activities are one of the priorities of ANR.

National AMR Action Plans

- **Écoantibio 2: Plan national de réduction des risques d'antibiorésistance en médecine vétérinaire (2017 - 2021);** the French national plan for the reduction of the risks of antimicrobial resistance in veterinary medicine

National AMR research calls

- ANR Generic call for proposals 2019 and 2020 + national priority on AMR: 2x3M€
- Bilateral call between France (ANR) and Germany (BMBF) on AMR in 2019 and 2020: 2x3,5 M€
- JPIAMR transnational call 2019 – “Diagnostics and Surveillance”
- JPIAMR network call 2020 “Network Plus”
- JPIAMR transnational call 2018 - Innovations against antibiotic-resistant bacteria: new targets, compounds and tools.
- JPIAMR working group 2018 – Surveillance
- JPIAMR working group 2018 – Virtual research institute

National AMR research programs

- [Écoantibio 2: Plan national de réduction des risques d'antibiorésistance en médecine vétérinaire (2017 - 2021)](https://www.inserm.fr); the French national plan for the reduction of the risks of antimicrobial resistance in veterinary medicine

Activities on AMR actions at national level

- Interministerial symposium Antibiotic resistance “Antimicrobial resistance monitoring: data for action”– Nov 20, 2019
- International Course on Antibiotics and Resistance (ICARE) at Pasteur Institute: May 31, 2020
- Antibiorésistance: enjeux et besoins en recherche et innovation - Colloque interministériel du 14 novembre 2018
