

Norway

Norway is represented by the Research Council of Norway in JPIAMR. The Norwegian strategy on AMR is implemented jointly by the Ministry of Health and Care Services, Ministry of Food and Agriculture, Ministry of Trade, Industry and Fisheries and the Ministry of Climate and Environment. Norwegian health authorities have during the last 20 years implemented various programmes in order to counteract antimicrobial resistance (AMR) and to prevent health care associated infections (HAI). The Ministry of Health and Care Services has the overall responsibility for all health services in Norway, including Health Care Associated Infections (HAI).

National AMR Action Plans

- [National strategy against antibiotic resistance; 2015-2020](#)

National AMR research calls

- <https://www.forskingsradet.no/en/call-for-proposals/2020/collaborative-project/>

National AMR research programs

- Norway has no single national program within AMR, but the topic is incorporated in other programmes as Health, Food, Marine, Environment and Independent Research
