

# Poland

Poland is represented in the JPIAMR by the National Medicines Institute and the Polish Academy of Science. The research in the area of AMR is principally funded by two agencies, National Science Centre (NCN) and National Centre for Research and Development (NCBR) by response-mode grants. Alert resistance in bacteria is constantly monitored for the whole country through an activity of the National Reference Centre for Antimicrobial Resistance and the National Reference Centre for Bacterial Meningitis, located at the National Medicines Institute in Warsaw.

## National AMR Action Plans

- [National Programme for the Protection of Antibiotics 2016-2020](#) (Ministry of Health, 2016, in Polish)

## National AMR research calls

- JPIAMR Joint Call on Diagnostics and Surveillance 2019
- JPI Water, JPI Oceans and JPIAMR Joint Call on Aquatic Pollutants 2020

## National AMR research programs

### Activities on AMR actions at national level

- Polish Society of Microbiologists Conferences 2019 & 2020
- Rational Antibiotic Therapy in Prevention of Healthcare-associated Infections Conference, 2020
- Workshop for public administration officials on hospital-acquired infections and globalisation of AMR, 2019
- Workshops for Hospital Infection Control Teams, 2019 & 2020
- Workshops for Antibiotic Therapy Teams, 2019 & 2020
- Clinical Microbiology Autumn School 2020 (online) – including AMR-dedicated sessions
- Point Prevalence Survey of Healthcare-associated Infections and Antimicrobial Use, 2020 with over 160 participating healthcare units
- European Antibiotic Awareness Day, 2019 - featuring 2 symposia and an Experts' Forum on AMR
- European Antibiotic Awareness Day, 2020
